**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-6, drawn to a cylindrical separator for cylindrical cells.

Group II, claims 7-16, drawn to a method for making a cylindrical separator closed at the bottom for batteries with a hollow cylindrical interior.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I does not recite that the width of the sheet separator material is at least as long as the length of the cylindrical portion of the separator, the extended portion is at least as long as the half diameter of the separator, a head portion is present on the mandrel, or a stationary rail is provided with a forming groove; Group II recites all of these special technical features. Accordingly, Groups I and II lack unity of invention.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 1795

The election of an invention may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
